- **Back-End Technologies** : Node JS, Express JS
- **Programming Languages** : JavaScript, HTML, CSS, SASS
- **Database** : MySQL
- **Version Control** : Git

Project Experience

Project Details:

Project #1

| | |
|---------------------------------------|---|
| Project Title | : JustPerform |
| Client | : Red Apricot |
| Domain | : Enterprise Performance Management (EPM) |
| Front-End | : Vue JS |
| Back-End | : Spring boot |
| Others (Libraries, Frameworks) | : Quasar Framework |
| Duration | : February 2024 – present |

Roles & Responsibilities:

- Understand requirements and map to technical implementation
- Designing and developing user interfaces using Vue JS
- Working as Front-End developer

Project #2

| | |
|---------------------------------------|-------------------------------------|
| Project Title | : FASTA |
| Client | : internal & external |
| Domain | : E-commerce |
| Front-End | : Angular |
| Back-End | : Node JS with MySQL |
| Others (Libraries, Frameworks) | : Angular Material, Bootstrap, NgRx |
| Duration | : August 2023 – January 2024 |

Roles & Responsibilities:

- Involved in Architecture and workflow design .
- Understand requirements and map to technical implementation
- Designing and developing user interfaces using Angular
- Involved in Requirement Gathering
- Involved in uploading images, videos to S3 using ExpressJS/multer as a middleware
- Involved in deployment of backend, frontend services in to AWS
- Worked as Full Stack developer

Project #3

| | |
|---------------------------------------|---|
| Project Title | : TudaApp (https://tudarental.com/) |
| Client | : TUDA (Tirupati Urban Development Authority) |
| Front-End | : Angular |
| Back-End | : Node JS with MySQL |
| Others (Libraries, Frameworks) | : Clarity Design |
| Duration | : May 2023 - present |

Roles & Responsibilities:

- Understand requirements and map to technical implementation
- Designing and developing user interfaces using Angular
- Building reusable code for future use
- Implemented routing for the application.
- Configured API Gateway for load balancing
- Implemented Schedulers for in time reception of notifications and bills for end user
- Implemented Mobile OTP integration
- Implemented WhatsApp integration
- Involved in integrating CC avenue payment gateway.
- Involved in deployment of backend, frontend, database services in to the AWS.

Project #4

| | |
|----------------------|---|
| Project Title | : Court's Diary (https://courtsdiary.com/) |
| Client | : external client |
| Front-End | : Angular |

| | |
|---------------------------------------|------------------------------|
| Back-End | : Node JS with MySQL |
| Others (Libraries, Frameworks) | : Clarity Design |
| Duration | : April 2023 –September 2023 |

Roles & Responsibilities:

- Understand requirements and map to technical implementation
- Designing and developing user interfaces using Angular
- Building reusable code for future use
- Worked as Full stack developer

Project #5

| | |
|---------------------------------------|--|
| Project Title | : UNICEF (https://unicef-iraq.com/home) |
| Client | : UNICEF |
| Front-End | : Angular |
| Back-End | : NodeJS with MySQL |
| Others (Libraries, Frameworks) | : Clarity Design, JS charts |
| Duration | : September 2022 – January 2024 |

Roles & Responsibilities:

- Understanding the project requirements and analyzing the requirements.
- Designing and developing user interfaces/layouts using Angular.
- Developing the required logic based on the code based on the client requirements.
- Implemented ChartJS to show measures of various informations.
- Implemented filters to dynamically change the chart
