Experience

- 
Artoon Solution Surat
UI/UX & Product Designer Present
 - Work on Admin Panel ,Mobile App & Website Design.
 - IMS Admin Panel (An IMS project manages and records data about hardware & office devices, including PCs, CPUs, hard disks, and mice etc. while also tracking damage and condition status for efficient IT asset management.)
 - Service Provider app (The Service Provider app connects job seekers with job opportunities and allows clients to find and hire workers, simplifying the job search and hiring process.)
 - Team 18 App (Led the redesign of Team 18's web platform, focusing on improving user engagement and streamlining workflows. Conducted extensive user research and created interactive prototypes to validate design decisions before development..)
 - Diamond CMS (Designed a comprehensive content management system that caters to the needs of Diamond CMS's clients. Conducted user interviews and created user personas to inform the information architecture and navigation. Implemented a responsive design approach to ensure optimal user experiences across devices.)
 - Artoon Mgp (Developed a user-friendly mobile application for MGP, focusing on seamless navigation and intuitive interaction. Collaborated closely with the development team to ensure pixel-perfect implementation and conducted usability tests to gather user feedback.)
 - 3+ games (Gaming App + admin panel for this app)
 - Redesign Website (Ultimate Connector and Easylandsell)
