[Completed in 2012]	
---------------------	--

PROJECTS

Mizi :

Bus ticket booking and surveillance service within the city and local areas wrapped up in the form of three apps-

User App (Capable of booking tickets and tracking the bus),

Captain App (Conductor in the bus capable of scanning and validating tickets of on boarding passengers from various stops on his route)

Partner App (owner of the multiple buses capable of tracking each of them on chosen routes with chosen conductors)

Prop Manage :

This project has two aspects, i.e. one application is for the manager and the other for the employee. Regarding the manager app, it is used to keep surveillance on the employees including the attendance marking system with current location. The manager can assign any task to the employee through the calendar in his app which will be reflected in the calendar of the employee's app.

Admin Panel: Through this admin panel the managing team of this project can have the overview of the application like number of employees, managers registered till now, details of any employee or manager, add new manager or employee and manage the data.

RWA :

RWA Admin :

This app is used by the admin of society, who is capable to add/remove vendor, RWA member, security guards, admin will approve or reject owner/tenant registration request, generate Barcode for vehicles, see all complaints/suggestion made by the residents and security guards location & attendance. Integrated Group Chatting using FCM with society members and admin has an extra facility to block/unblock a user.

RWA Security Guard :

This application is for Security Guards who will record all visitors entry/exit, residents/ owner in/out, will capture vehicle images etc.

RWA User :

This application is for Owner/Tenant, who are capable to send suggestion/complain, see all active vendors and connect them if required, Owner can apply for the membership etc. App will also help residents to pay maintenance fees/donation/Vehicle fees to society using Paytm.

Jobby :

There are two modules of this project.

One is **employer** and other is **seeker**. Employer can post their job with details and job seeker can find the jobs according to his skills and talent and apply for that job. Job seeker can quickly create and manage his resume also before applying for any job.

Wow Salon :

This application provides Salon services at home.

Got Game Brand :

This is the website of Sports wear clothes.

Website link : <https://www.gotgamebrand.com/>

Loginworks Website :

Worked on Loginworks Softwares website (Language used **WORDPRESS**).

STRENGTH

- Punctual
- Dedicated Towards work
- Ambitious
- Self motivated

DECELERATION

I hereby assure that all the information mentioned above are true.
