EXPERIENCE SUMMARY

With over 5 years of experience as a Lead Frontend Developer, specializing in React Native Web, React.js, and React Native, I have contributed to 5 distinct projects in the food-tech industry.

SKILLS

React Native Web	React Native	React.js
Javascript	TypeScript	Next.js
Tailwind CSS		

PROFESSIONAL EXPERIENCE

Posist Technologies

April 2023 - Jan 2024

Lead Front-end Developer

- Created kiosk for the food-tech industry that was capable of handling a large food menu without affecting the performance of the app. It also included multi-language support.
- Worked on MVC architecture and a multi-platform application using react-native-web library enabling seamless execution of the same code base across **Android, iOS, and Web platforms.**
- Closely collaborated with UI/UX designer and backend developers to integrate server-side APIs and user interface components to manage the flow of data.
- Developed modular code while following the DRY principle.
- Coordinated with the tester to fix bugs immediately.
- Built complex flows like the combo in a menu, optimized rendering a large list of items.

Lead Front-end Developer

- Built customer-facing, dashboard, and driver applications for the food-tech industry. Successfully deployed them on AppStore and PlayStore, and also published them as a web application.
 - **Point of Sale System (POS)** - allows businesses to accept payments from customers and keep track of sales.
 - Worked on operations like creating orders, payments, managing orders, punch-in/punch-out, cash management, day closing, etc.
 - **Dashboard** - allows business owners to monitor the reports, manage coupons, create menu, set store settings, etc. Built for both web and mobile.
 - Worked on menu builder and wrote process functions for handling different datasets.
 - Handled dynamic routing.
 - Built custom components like carousel etc.
 - **Food ordering application for Customers** - built it for Android and iOS using React Native and for the Web using React.js.
 - Developed entire components and screens from scratch and integrated server-side APIs.
 - Worked on Map, handling Delivery and Pickup use cases, etc.
 - **Customer-Facing Display (CFD)** - a system to display order details to the customer during the checkout process, for the order made using POS.
 - Made this responsive for web and tablet. Fetched the latest order data after a certain interval and displayed it in CFD.
 - **Kitchen-Display System (KDS)** - a system to optimize the way a kitchen operates by streamlining communication, controlling the way food is routed, and providing a real-time view of all kitchen information.
 - Closely collaborated with UI/UX designer and backend developers to integrate server-side APIs and user interface components to manage the flow of data. And also wrote process functions for the manipulation of data.
-

EDUCATION - Bachelor of Computer Application, GGSDS College, Sector 32, Chandigarh (2014 - 2017)
