ABOUT MYSELF & CAREER

With 7 years of hands-on experience, I'm a seasoned Mobile app developer skilled in React Native, ReactJS, Node.js, and ASP.NET. Leading impactful projects at AroobTech , Vqsolutions and YURDRIVERSNETWORK, I've seamlessly blended design finesse with functionality, as evident in platforms like salesvirtual.com and alphaeats.ie. Proficient in inventive problem-solving and collaborative innovation, I also have hands-on experience with payment gateways like stripe and little bit with AWS Services like S3, EC2 and RDS.

WORK EXPERIENCE

Senior Mobile App Developer   2021 - present
AroobTech I IRELAND (remote)

During my tenure at AroobTech as a Senior Mobile App Developer, I leveraged a diverse skill set encompassing Node.js, ReactJs, React Native. I played a vital role in developing AlphaEats.ie, a robust multi-restaurant system, while also gaining hands-on experience with managed workflow also with native modules.

Mobile App Developer   2019 - 2021
YURDRIVERSNETWORK | USA (remote)

Over a span of two years as a Senior Mobile App Developer at YURDRIVERSNETWORK, I amassed significant expertise in React Native mobile app development. My role involved crafting innovative, user-centric mobile applications, where I consistently demonstrated my proficiency in React Native development. My contributions not only enriched the user experience but also played a pivotal role in bolstering team success and advancing the company's objectives.

Web Developer   2017 - 2019
VQSOLUTIONS I UNITED KINDOM

As a web developer at VQSolutions, I showcased proficiency in Node.js and ASP.NET for backend, and React.js, Tailwind, and Bootstrap for frontend. A standout accomplishment includes my integral contribution to the development of Stedfast.io, a SaaS product, further enriched by my adeptness with AWS technologies.

Web Developer   2016 - 2017
ITSOLUTIONSLAB I PAKISTAN

During my role as a web developer at IT Solutions Lab, I skillfully utilized ASP.NET for backend development, alongside my expertise in HTML, CSS, and Bootstrap for frontend work. My contributions were integral to crafting dynamic web solutions, demonstrating a cohesive integration of these technologies to achieve impactful outcomes.

PROJECTS

Mobile Applications

alphaEats

Key Features:
- Online food ordering and order management system.
- User registration and profile management.
- Restaurant menu creation and customization module.

Technologies:
- Back-end developed with REST APIs using .NET.
- Front-end built with React Native for a responsive user interface.

Outcome:
- Successfully launched, enhancing user experience in food ordering and restaurant management.
- Received positive feedback for its seamless integration of .NET and React Native technologies.

YUR Driver Network

Key Features:
- User registration and profile management.
- Efficient ride booking and scheduling system.
- Integrated payment gateway for seamless transactions.
- Dynamic fare calculation algorithm.

Technologies:
- Back-end developed with REST APIs using .NET.
- Front-end built with React Native for a responsive user interface.

Outcome:
- Delivered a robust and user-friendly ride-hailing app, improving accessibility and convenience in urban transportation.

Americas Weather SC (AWSC)

Key Features:
- User registration for personalized weather updates.
- Access to meteorologist insights and analysis.
- Real-time weather reports and forecasts.

Technologies:
- Back-end developed with REST APIs using .NET.
- Front-end built with React Native for a responsive user interface.

Outcome:
- Developed a comprehensive weather tracking app, enhancing user engagement with accurate and timely meteorological information.

Web Applications

alphaEats Restaurant System

Key Features:
- Online food ordering and order management.
- User registration and profile management.
- Food menu creation module for restaurants.
- Promo code functionality for discounts.
- Support for multiple restaurant branches.
- Comprehensive reporting system.

Technologies:
- Developed with ASP.Net MVC and SQL Server.

Outcome:
- Successfully launched a multi-functional web application, streamlining food ordering and restaurant management processes.

Content Creator

Key Features:
- Tools for creating and managing books, lessons, and chapters.
- Feature to export books in various formats.
- Implementation of an advanced text editor.
- Integration of SCORM (Sharable Content Object Reference Model) package system.

Technologies:
- Built with Node.js, Next.js, TailwindUI, and MySQL.

Outcome:
- Developed an innovative web application for seamless digital content creation and management, enhancing educational resource development.

Stedfast

Key Features:
- Development and management of assessment plans.
- Tools for curriculum planning and tracking.
- CPD (Continuing Professional Development) management system.
- Staff performance management features.
- Management of policies, procedures, and risk assessments.
- Creation and administration of forms and surveys.

Technologies:
- Built using ASP.Net and SQL Server.

Outcome:
- Successfully delivered a comprehensive educational management application, streamlining various administrative and educational processes.

Sales Virtual

Key Features:
- Blog and Playbooks creation, update, and management (CRUD).
- User registration and management system.
- Book purchasing functionality.
- Integrated payment system.
- Detailed orders log and user dashboard.

Technologies:
- Website built on WordPress, with the app developed using Next.js, NodeJS, and MySQL Workbench.

Outcome:
- Developed a versatile sales-focused web application, enhancing user engagement and streamlining sales-related processes.
