Minilec(India)Pvt.Ltd.,Pirangoot, Pune.

Designation: Testing Engineer

## Projects:

### Personal Portfolio

- **Description:** Developed a comprehensive online portfolio to showcase my web design and writing projects. This portfolio is designed to demonstrate my range of skills and professional capabilities.
- **Technologies and Skills Used:** HTML, CSS, JavaScript
- **Key Achievements:** Improved my visibility and professional presence online.

### Flipkart Clone

- **Frontend Technologies:** The Flipkart Clone project utilizes HTML, CSS, and JavaScript for the frontend development
- **Functionality:** The project is designed to replicate the functionality and user experience of the well-known e-commerce platform Flipkart.
- **User Experience:** The project aims to provide users with a shopping experience similar to Flipkart, ensuring a seamless and familiar interface for users interacting with the platform

### Calculator Application

- **Web-based Calculator:** Developed a fully functional calculator application using HTML, CSS, and JavaScript.
- **Basic Arithmetic Operations:** Implemented core arithmetic functions, including addition, subtraction, multiplication, and division.
- **User Interface Design:** Created an intuitive and responsive layout for user interaction, ensuring a user-friendly experience.
- **Event Handling:** Utilized event handling techniques to capture user inputs and trigger calculations.
