EXPERIENCE

WIPRO ARABIA | SOFTWARE CONSULTANT

Saudi Aramco (Client)

July, 2022 – Present | Saudi Arabia

- Create well-designed, efficient, and reusable user interface components using Angular.
- Implement responsive designs and ensure cross-browser compatibility.
- Develop and maintain single-page applications using Angular, ensuring a smooth and interactive user experience.
- Implement client-side routing in Angular applications for seamless navigation and user experience.
- Designed RESTful APIs and integrated them with third-party services, enhancing application functionality and interoperability.
- Integrate Angular applications with back-end APIs, making asynchronous requests and handling responses.
- Write clean, maintainable, and efficient code.
- Designing and developing Angular components from scratch leveraging existing UI component libraries like PrimeNG, Font Awesome and Bootstrap
- Primarily used Java and Angular with Spring Framework, experience with Oracle SQL, Java, Weblogic, Mybatis
- Collaborate with UI/UX designers to implement design specifications and create visually appealing interfaces.
- Use version control systems, such as Git, to manage and track changes to the codebase.
