Bachelor of Communication And Electronics Engineering, (Excellent) Sohag University

2020 - 2025

SKILLS

Programming	Kotlin, Java, Dart, Python, C, C++
Technologies	Flutter, DI, RESTful APIs,Flows , Coroutine , Jetpack Compose

EXPERIENCE

Software Engineer Intern in Android — July 2023 - Oct 2023
Robusta Studio — *New Cairo, EG*

- Developed core Android native applications using clean architecture and modern techniques such as Jetpack Compose, KMM, and Flows.
- Collaborated with a skilled team under the guidance of team leads and senior engineers.

Mobile Developer — Oct 2021 - Present
Freelancer — *Remote*

- Developed various Native and Flutter applications for diverse global clients.
- Created a Notary Service application for Canadian immigrants, incorporating features like video calls and E-signatures.
- Designed a Delivery Service app for a Cairo-based delivery company.

PROJECTS

Study With ChatGPT. Developed the "Study With ChatGPT" Android app, supporting students in their studies. The app features:

- Interactive chatbot for answering academic queries and providing study tips.
- Note-taking functionality.
- Agenda features for organizing tasks and coursework.
- Unified platform for students to access resources and track academic progress.

GitHub Repo

Food App Developed a Kotlin app with clean architecture, dependency injection, and adhering to S.O.L.I.D principles. Utilized Jetpack Compose for UI design. GitHub Repo

ACHIEVEMENTS

Egyptian Collegiate Programming Contest (ECPC)

- ACPC Finalist 2021
