CAREER OBJECTIVE

Creative Front-End Developer offering 2 years of experience providing high-impact web solutions for diverse industry organizations. Skilled in designing, developing and testing multiple web-based applications incorporating a range of technologies. Aspiring to combine broad background with strong technical skills to excel as a Front-End Developer.

WORK EXPERIENCE

Junior Front-End Developer

Borasoft Technologies: Jan 2021 - current

- Led development team of 5 to create GitHub pages, allowing customer repositories to be hosted directly.
- Developing websites from front to backend using PHP, JavaScript, and HTML.
- Manage website development projects from initial design through completion, optimizing all cross-browser and multi-platform compatibility.
- Work closely with programmers and clients to meet project requirements, goals, and desired functionality.
- Conduct training for clients on handling website content management systems.
- Enhance user experience and accomplish webpage objectives by creating site structure, navigation, page optimization, and graphics integration.
- Implementing enhancements that improved web functionality and responsiveness.
- Designing and maintaining both corporate and client websites, using scripting languages and content management systems including WordPress.
