# Our Services

Our prime goal is to provide our clients with unique solutions through consultations and to provide our services by their needs.

## Web Technologies

We craft attractive designs in technologies like VUEJS, ANGULAR and HTML5, enhancing experience and usability of the audience. We use these technologies to enhance graphics design, page loading efficiency, consistent navigation and perfect visualization.

## Mobile Application Development

We create scalable mobile applications for Android and iOS systems using technologies like FLUTTER and IONIC which helps us in reducing development and delivery time.

# Our Services

## Startup Consulting

We provide consultancy to Startups to plan and build their business on various different technology stack suggested by our deep & periodic analysis. We also help startups to carry Cost optimisation strategies for infrastructure management.

## Deployment Automation

Our most recent skill addition comes in automation. As technology is heading towards a robotic world, We aspire to bring the smallest task to be done systematically and probably automate it, setting an easy process for startups to focus on business optimisation.

# Testimonials

"Weldone Patel, You did a great job. Highly appreciated. One thing i love about you Patel is your patience with clients. You really took your time to teach me even when i was slow. you are great bro, i will always continue working with you." - **Kingsley Opute (Ionic App)**

"Perfect developer. Very fast and confident. I would hire him again. Finished everything before deadline. Good communication. Cooperative." - **Mohammad Mahbubuzzaman (Angular 6)**

"Divesh has nice knowledge of ionic and he also works on ASO for android / ios apps. I would like to recommend this guy to anyone looking for complete app development including its marketing." - **Vijay Bhorkhade (Ionic App)**

"Quick to understand requirements and communicate effectively on scope." - **Suresh Sir (Website)**

# Testimonials

*"Divesh was fantastic to work with! He completed the job extremely quickly and even provided me some insight as how to keep our site optimized in the future. I highly recommend working with him!"* - **Ryan (Wordpress Optimisation)**

*"Very knowledgeable in ionic. We had issues in finalizing and communicating requirement maybe because the project has lots of integrations and moving parts. Maybe we can work together in future when we have a bigger project with better documented requirements."* - **Rakesh Ranjan (Leading Dots Pvt Ltd)**

*"Divesh is a skillful and knowledgeable developer,i have this booking call system build from scratch experience with him,he provided a lot idea to make it user friendly and easier to met my budget,as a startup company i do not have much budget for it. after the project complete ,i encounter some bugs,he was very promptly to get back to me and checking issue,even tho the project ended,he did not denied to help me out and provide support. overall great experience,highly recommended. Thank you Divesh."* - **Linus Goh**

# Development Approach

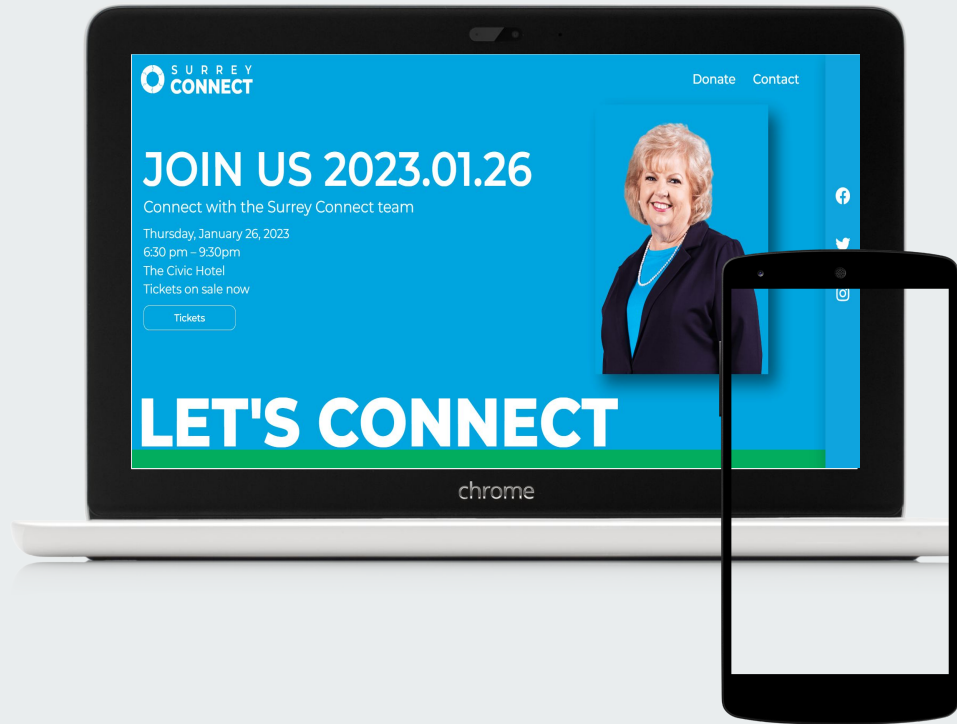

Our main goal is to provide our clients with personalized advice and services that meet their specific needs. We take pride in our capacity to fully comprehend our client's businesses, workflows, procedures, and unique requirements. This enables us to customize our services to each client's needs to offer them the best possible answer. Our spiral-based process enables us to quickly adapt to new requirements in subsequent phases and precisely incorporate them. It improves client satisfaction.
