Mr. Mohammed Faud

Date of birth: 14/07/1995   **Phone number:** 0562802420   **Email address:** atikfouad@gmail.com

PROFILE

As a seasoned developer with over 5 years of expertise in crafting dynamic web and mobile applications, I am dedicated to delivering optimal speed, security, and user experience. My strength lies in prioritizing agile development methodologies and cultivating robust code architecture that leads to successful project outcomes.

WORK EXPERIENCE

Senior Developer
Autobia

📅 08/2022 – present   📍 KHOBAR, SAUDI ARABIA

Professional Summary: Developed multiple apps and upgraded the internal company systems to enhance sales, marketing and purchase management primarily using Reactjs, React native and Nodejs.

- Spearheaded the development of a cutting-edge B2B mobile marketplace for the sale of car parts.
- Designed and executed a cross-platform mobile application that significantly improved the performance of sales executives and delivery personnel.
- Boosted monthly sales by an 40% and customer retention by 20% leveraging app features and process automation.
- Managed the design and development of the store application, ensuring that all features met specific market requirements and user expectations.
- Integrated with external service providers such as Algoolia, Branch io and native notify to leverage optimized search engine performance and indie notifications

Senior Developer
Lean Business Services

📅 11/2020 – 07/2022   📍 RIYADH, SAUDI ARABIA

Professional Summary: As a Senior Developer, I have contributed my expertise towards enhancing the functionality of government health organizations, including Sehaty and Anat. My notable accomplishments include:

- Taking the lead for creation of a medical jobs marketplace, streamlining the job search process for certified medical professionals and promoting seamless hiring for healthcare facilities.
- Pioneering the development of a secure chat service for patients, enabling them to connect with their assigned doctors within the government healthcare framework.
- Designing and implementing a robust CMS system prototype to effectively manage multi-application content, streamlining workflows and boosting organizational efficiency.

Front-end web developer
Trackplan FM

📅 10/2019 – 10/2020   📍 LIMERICK, IRELAND

Professional Summary: Developed Progressive Web Applications utilizing Reactjs for facility management, delivering exceptional digital solutions to clients.

- Customized features tailored to specific client needs, effectively heightening user experience and satisfaction.
- Made valuable contributions to open source software, integrating BlackBox AI's QR code scanning features on PWAs to improve functionality and usability.
- Ensured scalability and security of high-profile clients' systems, including The Australian Open, through diligent testing and optimization.

WORK EXPERIENCE

- Facilitated successful customer onboarding initiatives on-site in Ireland and Saudi Arabia, providing hands-on assistance and support.

Programmer analyst
Oracle

📅 07/2017 – 07/2019 📍 BANGALORE, INDIA

Professional Summary: Accomplished Programmer Analyst with expertise in Disaster Recovery System Development and system automation to ensure optimal system functionality.

- Coordinated with Oracle clients to establish efficient disaster recovery systems.
- Automated back-ups and fall back protocols to prevent data loss and minimize downtime.
- Developed web pages using python and React to monitor back-up health, automate disaster recovery processes to guarantee system reliability and optimal performance.

EDUCATION

Computer Science | B.E.
NMAMIT

📅 05/2013 – 05/2017 📍 MANGALURU, INDIA

- Achieved a remarkable GPA of 7.85 upon graduation
- Secured a position at Oracle through campus recruitment efforts
- Developed and delivered an advanced image search algorithm utilizing Hoffman coefficients and regression lines, employing Python programming language

Software Development | Masters of Engineering
University of Limerick

📅 09/2019 – 10/2020 📍 LIMERICK, IRELAND

- Graduated with a distinguished academic record, earning a GPA of 3.24/4.
- Conceptualized, designed, and developed a pioneering NLP application that identifies instances of Islamophobia on prominent news houses' tweets.
- Spearheaded the development of a robust full-stack application that scaled and improved the in-college restaurant reservation and coupon system.
