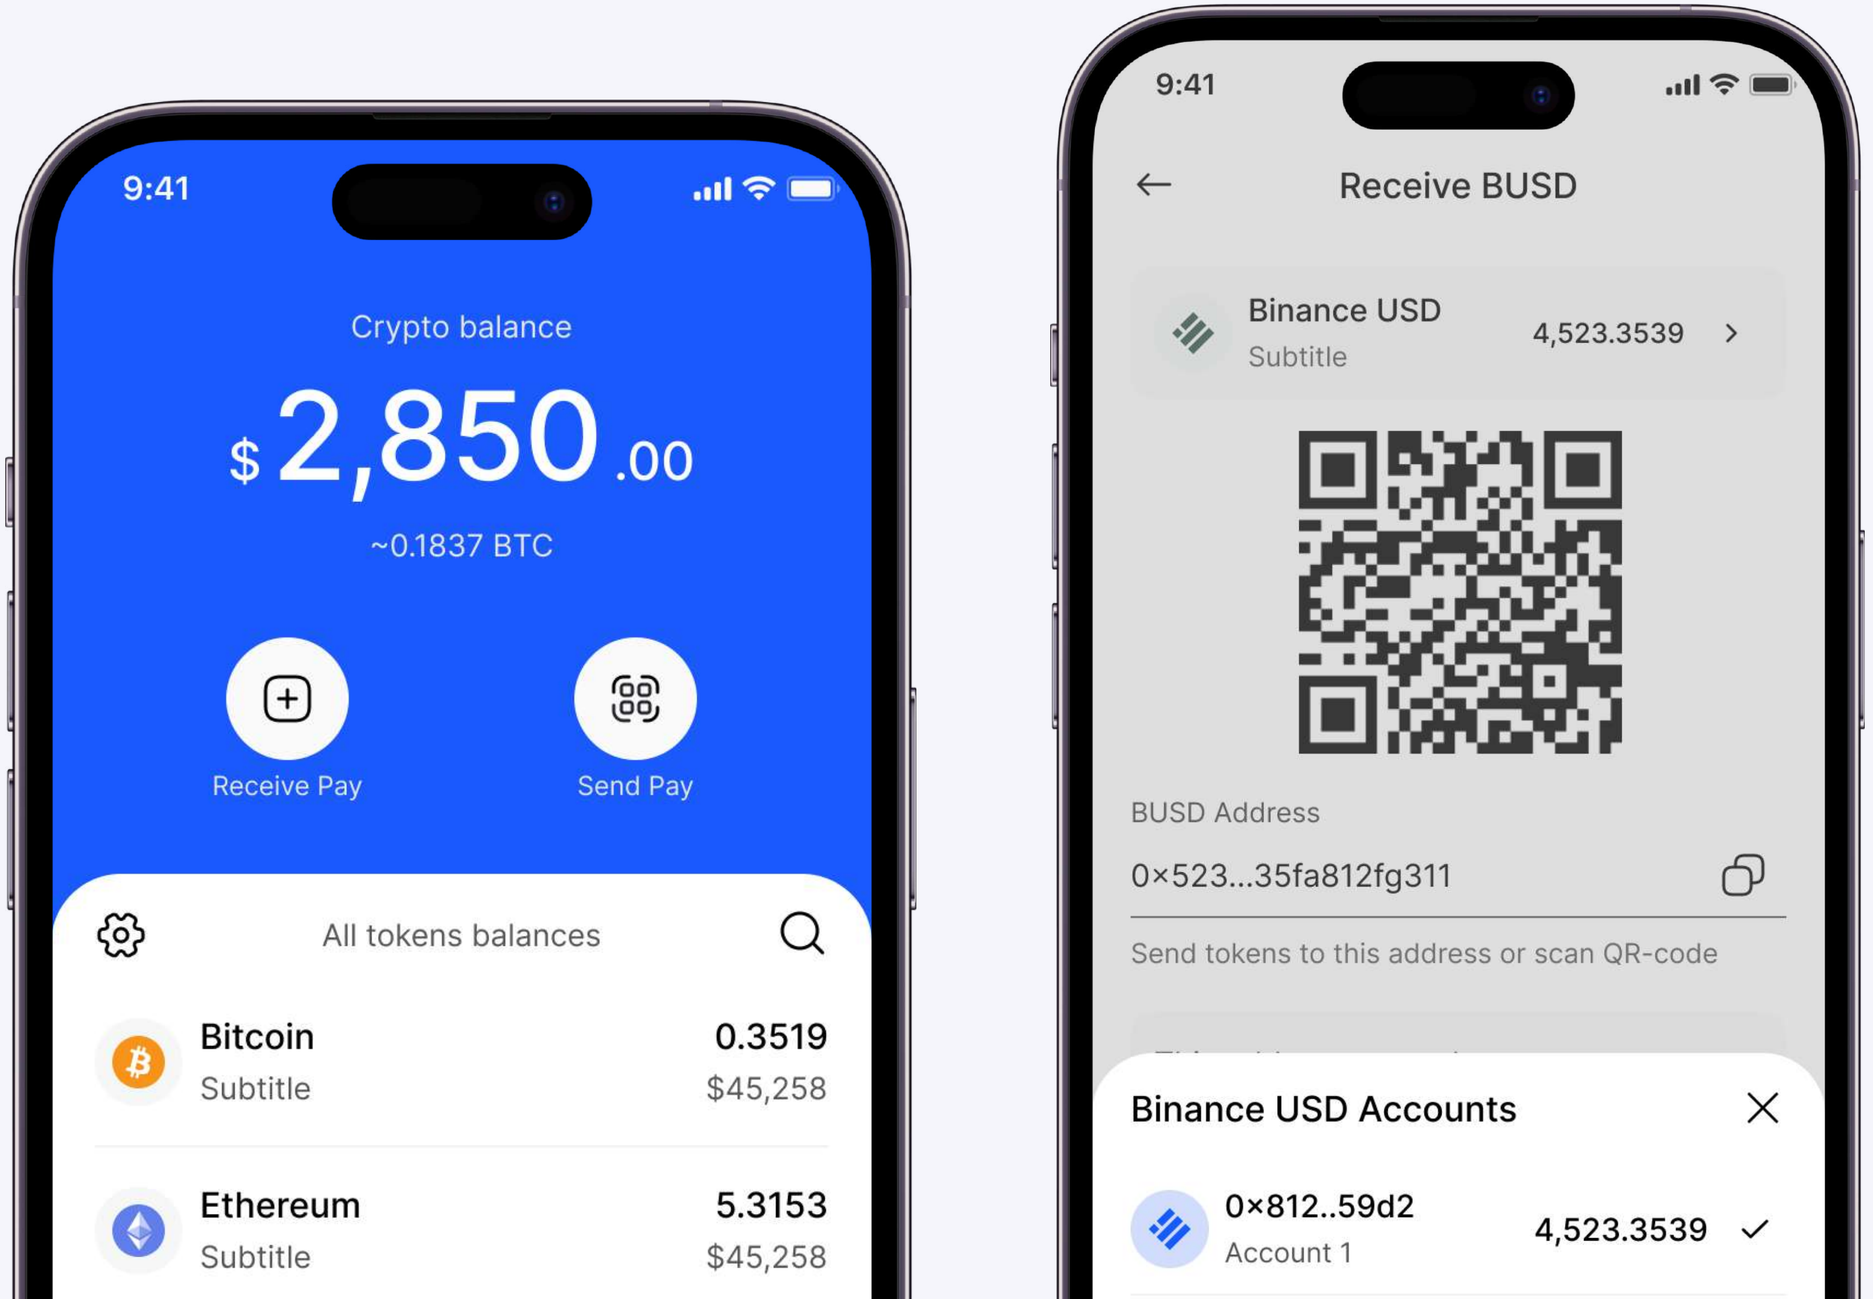
Crypto Multi-Wallet Features



Find the Best Fit: Non-Custodial vs. Custodial

Comparing	Non-custodial	Custodial
Security	User in charge of safety	Institutional-grade security systems
User Experience	Complex as users have to manage their own keys and backups.	User-friendly with simpler interfaces
Recovery Process	If the private key is lost, access to funds is irretrievable.	Users can recover accounts using verification methods.

Unveiling the Crypto Payment Gateway

List of Features:

- Automated crypto acceptance
- QR code payments
- Recurring payments
- P2P transactions
- Unified management panel

Comparing	Self development	White-Label solution
Initial Cost	Starts from $150k	**Starts from $30k**
Time to Market	Typically 40 weeks	4 weeks production phase
