- DeFi Application
- Exchange(DEX/CEX)
- Cryptocurrency Wallet
- Crypto Banking
- Crypto Lending
- Crypto Staking
- Coin/Token
- IDO/ICO
- Blockchain
- Metaverse

Our Services

- Web3 end-to-end Development
- Custom Software Development
- Web Application Development
- Mobile Application Development

65+ projects delivered

We build & scale end-to-end blockchain-enabled solutions across development stages, often at the intersection of emergent technologies such as AI and IoT.

COMPANY OVERVIEW

Starting in 2013 with San Francisco, London, and Delhi offices, PrimaFelicitas is a bleeding-edge blockchain development company at the forefront of core end-to-end blockchain engineering.

With Alums from Stanford & LBS, with 25+ years of experience in Technology & FinTech and 6+ years in Blockchain, PrimaFelicitas houses one of the most potent blockchain development teams.

With its exceptionally talented Blockchain development team, the company has been responsible for developing several cutting-edge blockchain-enabled products in the past six years, including Exchanges (Centralized/Decentralized), Wallets & Custody Solutions, Payment gateways, DeFi, NFT, etc.

SOME OF OUR SERVICES

- Initial technical & business consulting.
- Finalize the complete technology stack & solution architecture.
- Build the application cutting across blockchain protocols (the company is blockchain protocol-agnostic).
- Set up the initial infrastructure and monitor it continually based on user influx.
- Upgrade and optimize the infrastructure to ensure maximum Up-Time of the application.
- Conduct a comprehensive security audit before the application launch, and subsequently monitor the application and enhance security systems regularly to avoid malicious actors.
- Maintain & support the system post-launch.
- Be the client's Operations Team and run the application post-launch.
- Carry out the knowledge transfer process to train the client's internal teams.
