June 2017-May 2019

2 year

Sajas Electricals

Junior Electrical Engineer

- Junior electrical engineer with a solid foundation in electrical principles, circuits, and systems.
- Proficient in utilizing engineering software and tools for designing and analyzing electrical components.
- Skilled in assisting with the installation, maintenance, and troubleshooting of electrical systems and equipment.
- Demonstrates strong problem-solving abilities and a keen eye for identifying potential electrical issues.
- Eager to learn and contribute to projects, while collaborating effectively with senior engineers and team members.
- I perform various tests on the panels to ensure their reliability and adherence to safety regulations. These tests may include functionality testing, insulation resistance tests, and voltage checks.
- Troubleshooting: In case of any issues or malfunctions, I assist in diagnosing and resolving electrical problems in the panels. This requires a good understanding of electrical principles and problem-solving skills.
- Compliance with Codes and Standards: Stay up-to-date with electrical codes and safety standards relevant to panel board installations. Compliance with these regulations ensures the electrical system's safety, efficiency, and adherence to industry best practices.
