

Vinayak Ajith

Software Test Engineer

Profile

Dedicated and motivated software test engineer having 1+ year experience seeking a role where I can apply my expertise in test case preparation, testing methodologies, automation testing using Selenium, and defect management to drive continuous improvement in software quality. I am eager to contribute my skills, knowledge, and passion for quality to a dynamic team.

Job Summary

Software Quality Engineer

Citrus Informatics India Private Limited , Thrikkakara ,Ernakulam | May 2022 - April 2023

- Prepared test cases based on the Business Requirement Documents received and executed test cases to ensure that the application behaves as specified.
- Conducted manual testing of various web and mobile applications, and identified and reported over 100 bugs and issues that were subsequently resolved by the development team.
- Conducted Functionality testing, Retesting, Regression testing, End to End testing, Browser Compatibility testing, Smoke testing, and Sanity testing for various projects.
- Coordinated testing activities with other testers and test leads and was proactively involved in daily stand-up meetings and defect review meetings.
- Detected and tracked software defects and errors and prepared defect reports.
- Logged and regressed all defects found during testing into Mantis
- Worked and interacted with the developers to troubleshoot and resolve defects and issues, resulting in increased customer satisfaction and a 10% decrease in defect tickets.
- Prepared daily status reports and updated the team lead on everyday basics through emails.
- Actively participate in learning sessions and training programs to enhance testing skills.
