📄 Projects

— **ApexPongBattle**
a platform where you can play ping pong game live with your friends and chat with them , create channels and more ...

— **Portfolio**
A portfolio created using Next.js, R3f and Tailwind CSS. The combination of these state-of-the-art technologies has resulted in a website that is both eye-catching and functional, with easy navigation and breathtaking 3D visuals.

— **CUB3D**
A game where the player navigates using raycasting to detect walls from their perspective.

AND MORE ...
