API
Tokens

Tokens payment is a type of digital payment system that uses tokens instead of traditional currency.
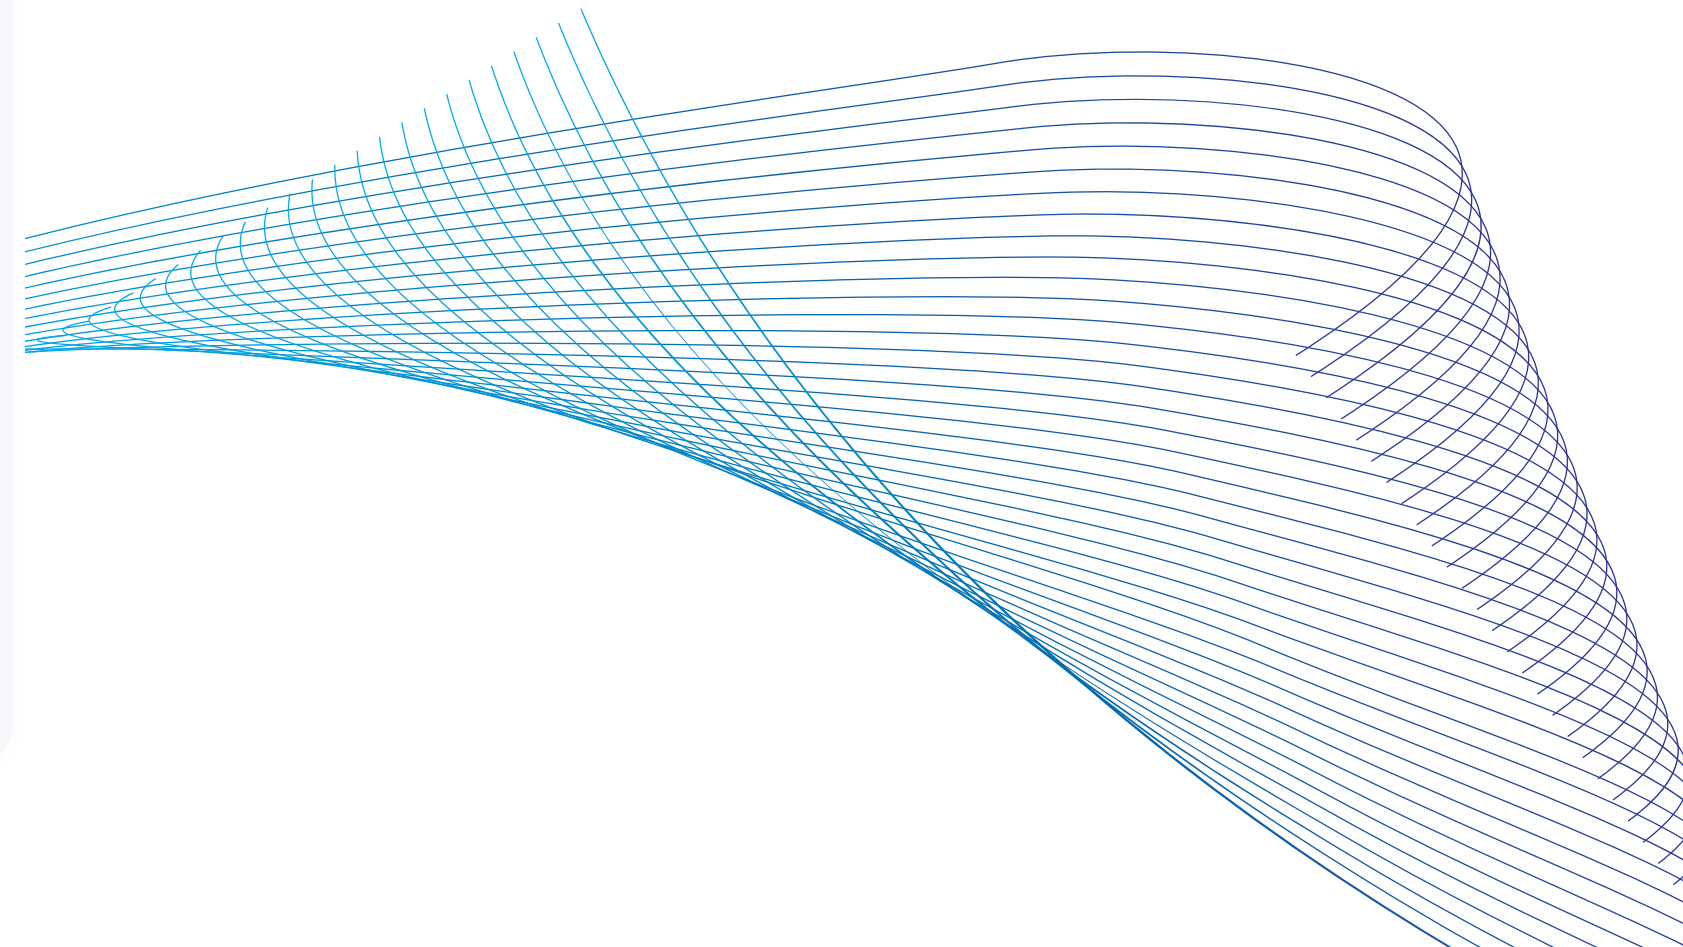

OUR FEATURES

Mobile Payments

Mobile-optimized checkout pages for a seamless payment experience on mobile devices. In-app payment options for mobile applications. Mobile wallets integration, allowing customers to make payments using their preferred mobile payment methods.

Tokenization

Tokenization of sensitive payment data such as credit card numbers to protect customer data from being exposed in the event of a data breach. PCI compliance to meet industry standards for data security. Token vaults that store encrypted payment data for secure and easy future transactions.

IMPS for INR

Acceptance of payments in Indian Rupees using the IMPS payment method for a convenient payment solution for Indian customers. Real-time payment processing with instant payment confirmation for faster payment processing times. Integration with UPI (Unified Payments Interface) for seamless payment processing.

Fraud Detection

Real-time fraud monitoring using AI algorithms to detect and prevent fraudulent transactions. Address verification to confirm the accuracy of billing and shipping addresses. Multi-layered authentication and verification processes to prevent fraudulent activities.

Multi-Currency Support

Dynamic currency conversion to allow customers to pay in their local currency while merchants receive payment in their desired currency. Automatic currency conversion based on the current exchange rate to provide accurate pricing and payment processing. Multi-currency wallets that allow customers to hold and pay with multiple currencies.

Risk Management Bots

AI-based bots that monitor market trends and detect potential price fluctuations in cryptocurrencies to help merchants minimize their exposure to price volatility. Real-time notifications and alerts that keep merchants informed of market changes that may affect their payment processing. Customizable risk management settings that allow merchants to adjust their risk management strategies based on their business needs. By offering these subfeatures, payment gateway providers can deliver a comprehensive payment processing solution that meets the needs of both merchants and customers.

Recurring Payments

Automated billing and payment processing for subscriptions and recurring services. Subscription management tools, allowing customers to manage their subscriptions and payment methods. Customizable payment schedules to meet the specific needs of customers.

Invoicing

Customizable invoice templates that match a merchant's branding and design. Automated payment reminders and notifications to improve payment processing times. Invoice tracking and reporting tools that provide a clear overview of payment statuses.
