About Advapay

Advapay is a technology company providing the Digital Core Banking platform that delivers all essential functionalities, a back-to-front system and a set of tools to customise and bring new integrations. Besides the technical infrastructure, the company provides business advisory and fintech licensing services.

The Advapay logo consists of the word "advapay" in a lowercase, blue, sans-serif font. The letters are bold and modern, with a slight shadow effect.

We help companies to launch their fintech businesses from scratch

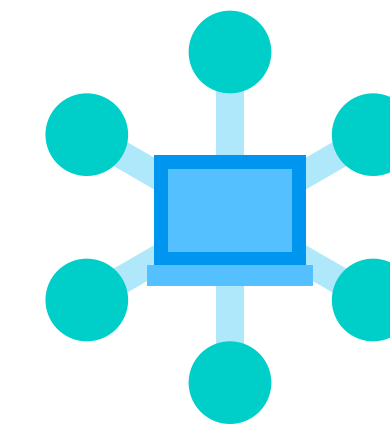

What we offer:

Core Banking Software with front-end and back-end

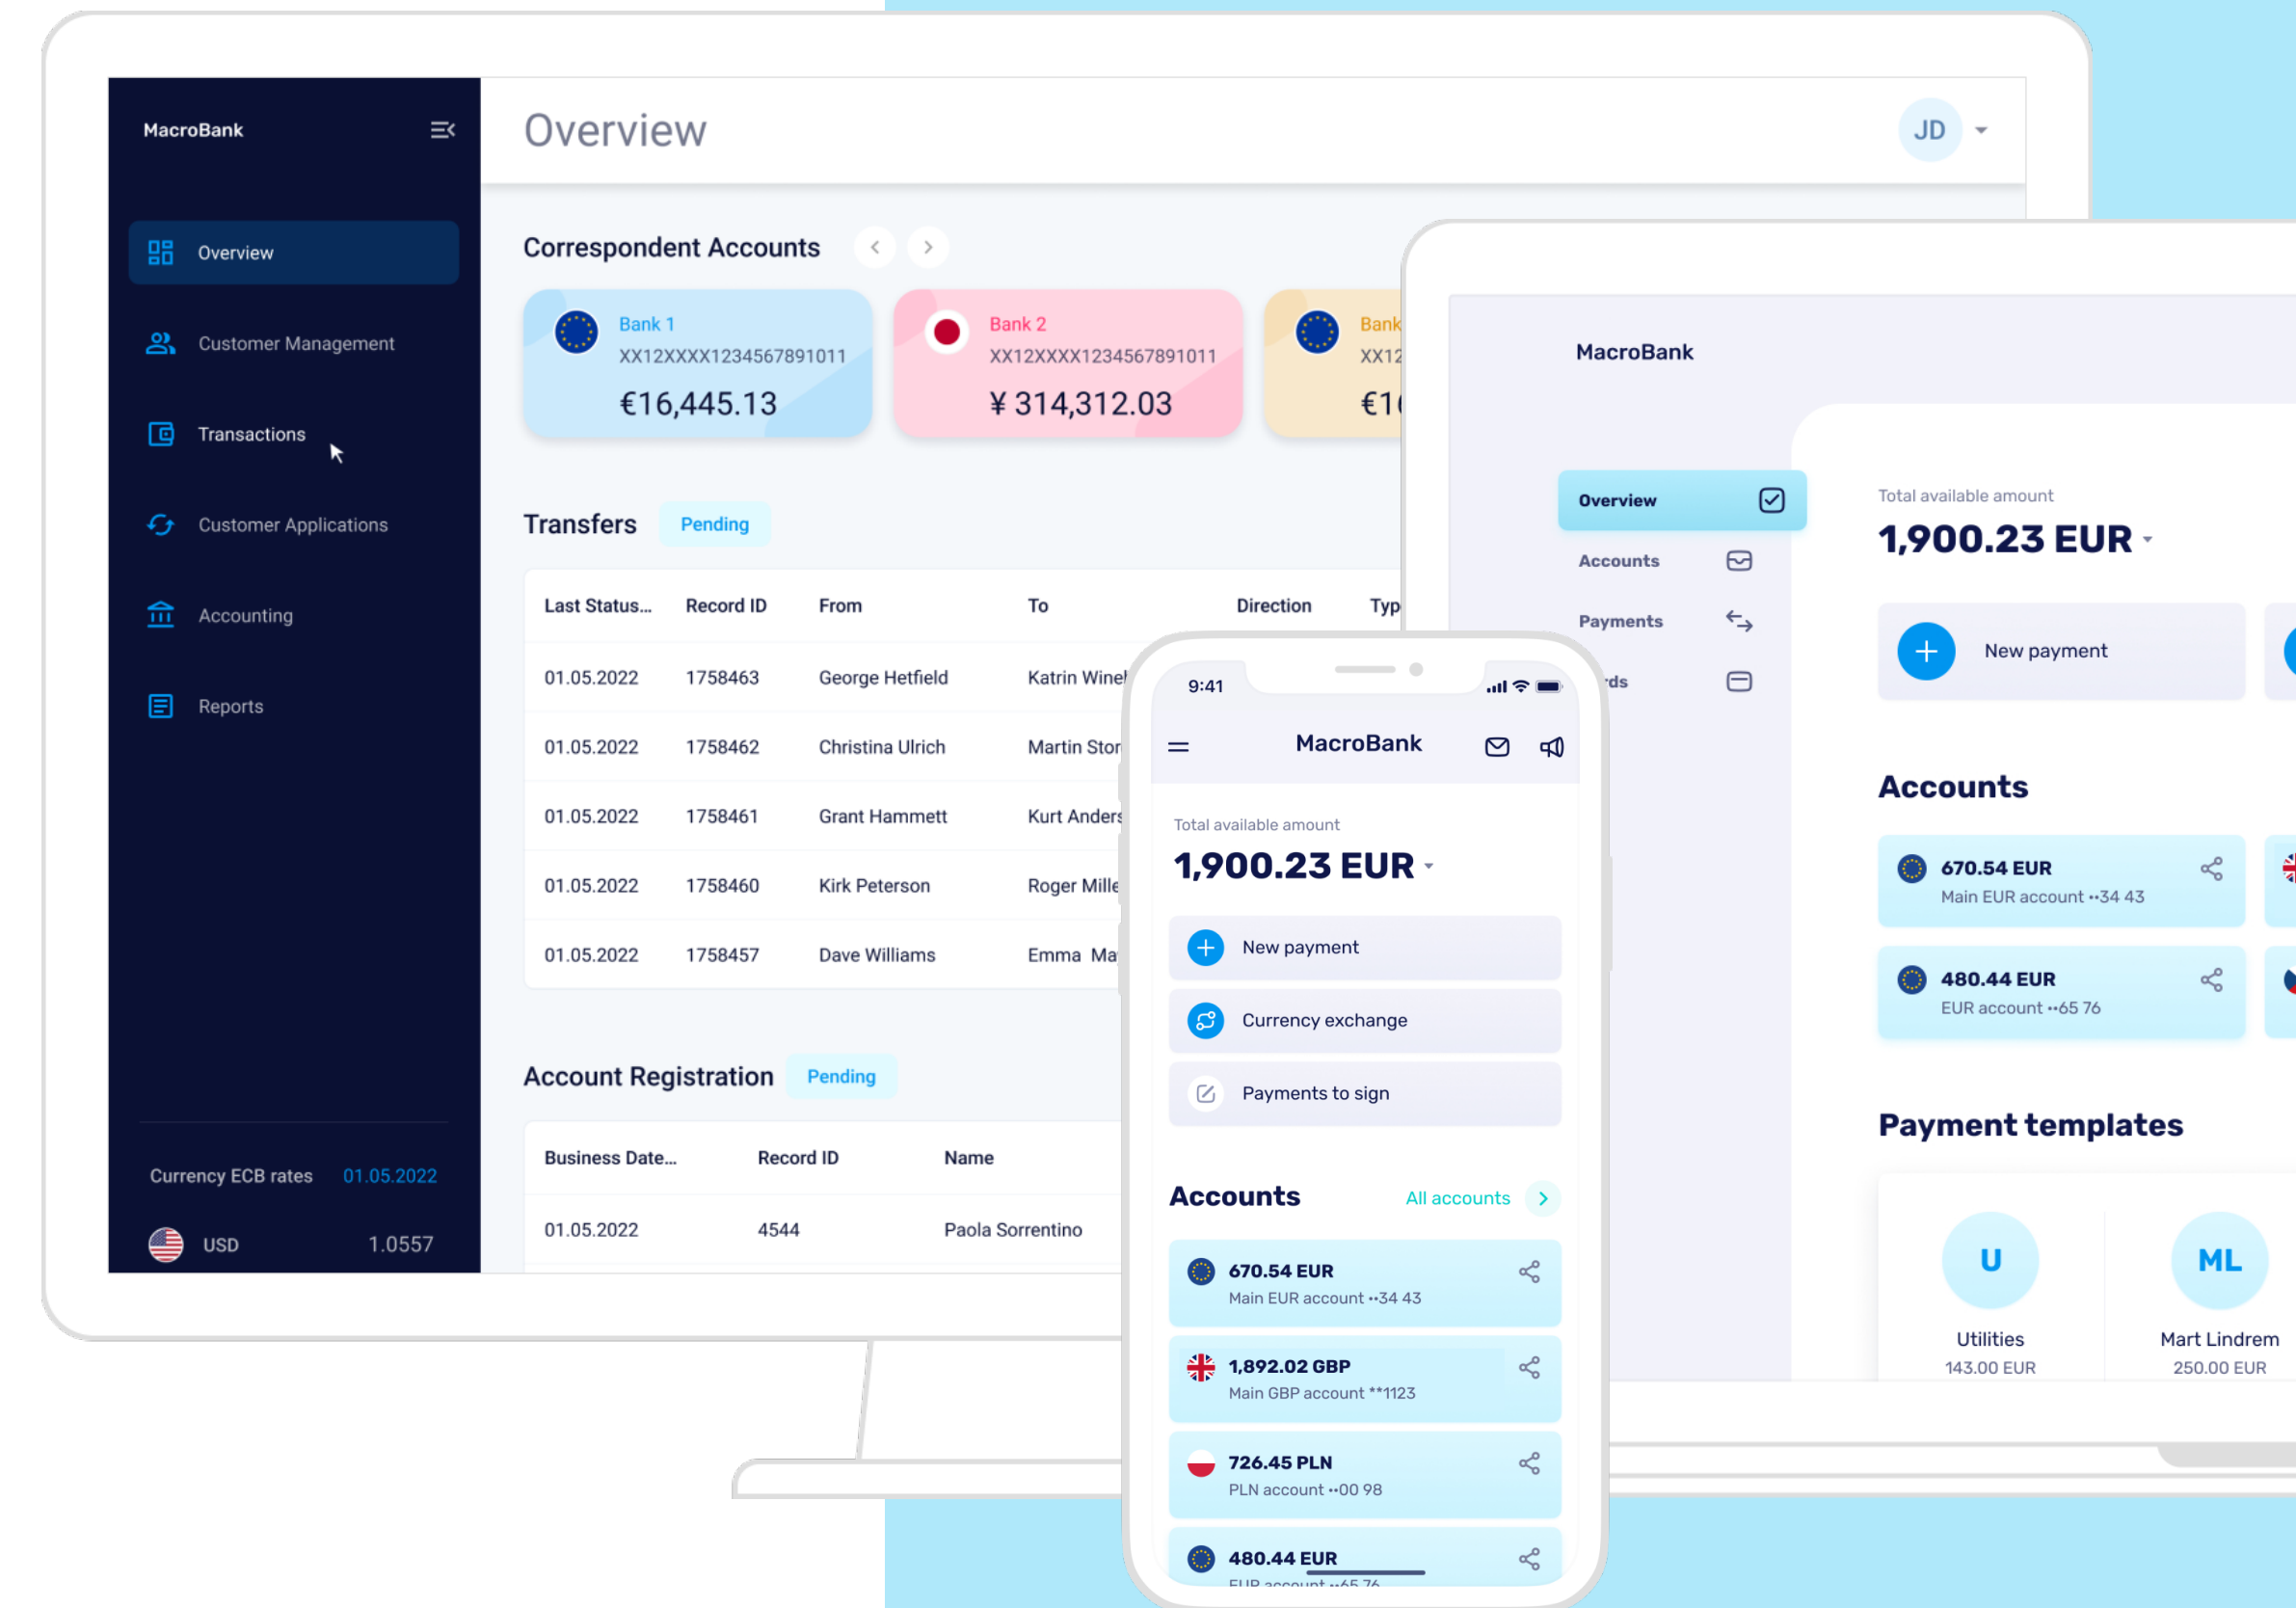

Fintech advisory and assistance in obtaining payment, e-money and MSB licences

Payment infrastructure development and BaaS solutions from trusted payment services providers

Core Banking software Macrobank

- ✓ Diverse functionalities supported: client onboarding, opening accounts, payments, card issuing, managing clients, applications and transactions, financial accounting, and many more.
- ✓ Ready integrations with banks, payment services, FX providers, AML/KYC service providers, card issuers, and more.
- ✓ Highly functional **back-office** & white-label web and mobile banking apps.
- ✓ Flexible Deployment and payment options: SaaS, software license, software source codes.

Fintech advisory and licencing

We help to run fintech businesses

- Jurisdiction selection and structuring advice (EEA-UK jurisdictions, Canada (MSB) and others)
- Preparation of all business, IT, and compliance documentation
- Communication with regulators
- Local team recruitment
- Provide regulatory-compliant software with comprehensive descriptions

Fast way to start a payment business

Canadian MSB license, including software and payment infrastructure

The best all-around jurisdiction for new fintechs. It is commonly used by companies with different risk profiles and business models (remittance, e-wallets, crypto).

Pros:

- Affordable, easy, and fast registration
- Covers a wide range of fiat and crypto payment services
- Friendly regulator, open to international businesses

What we offer:

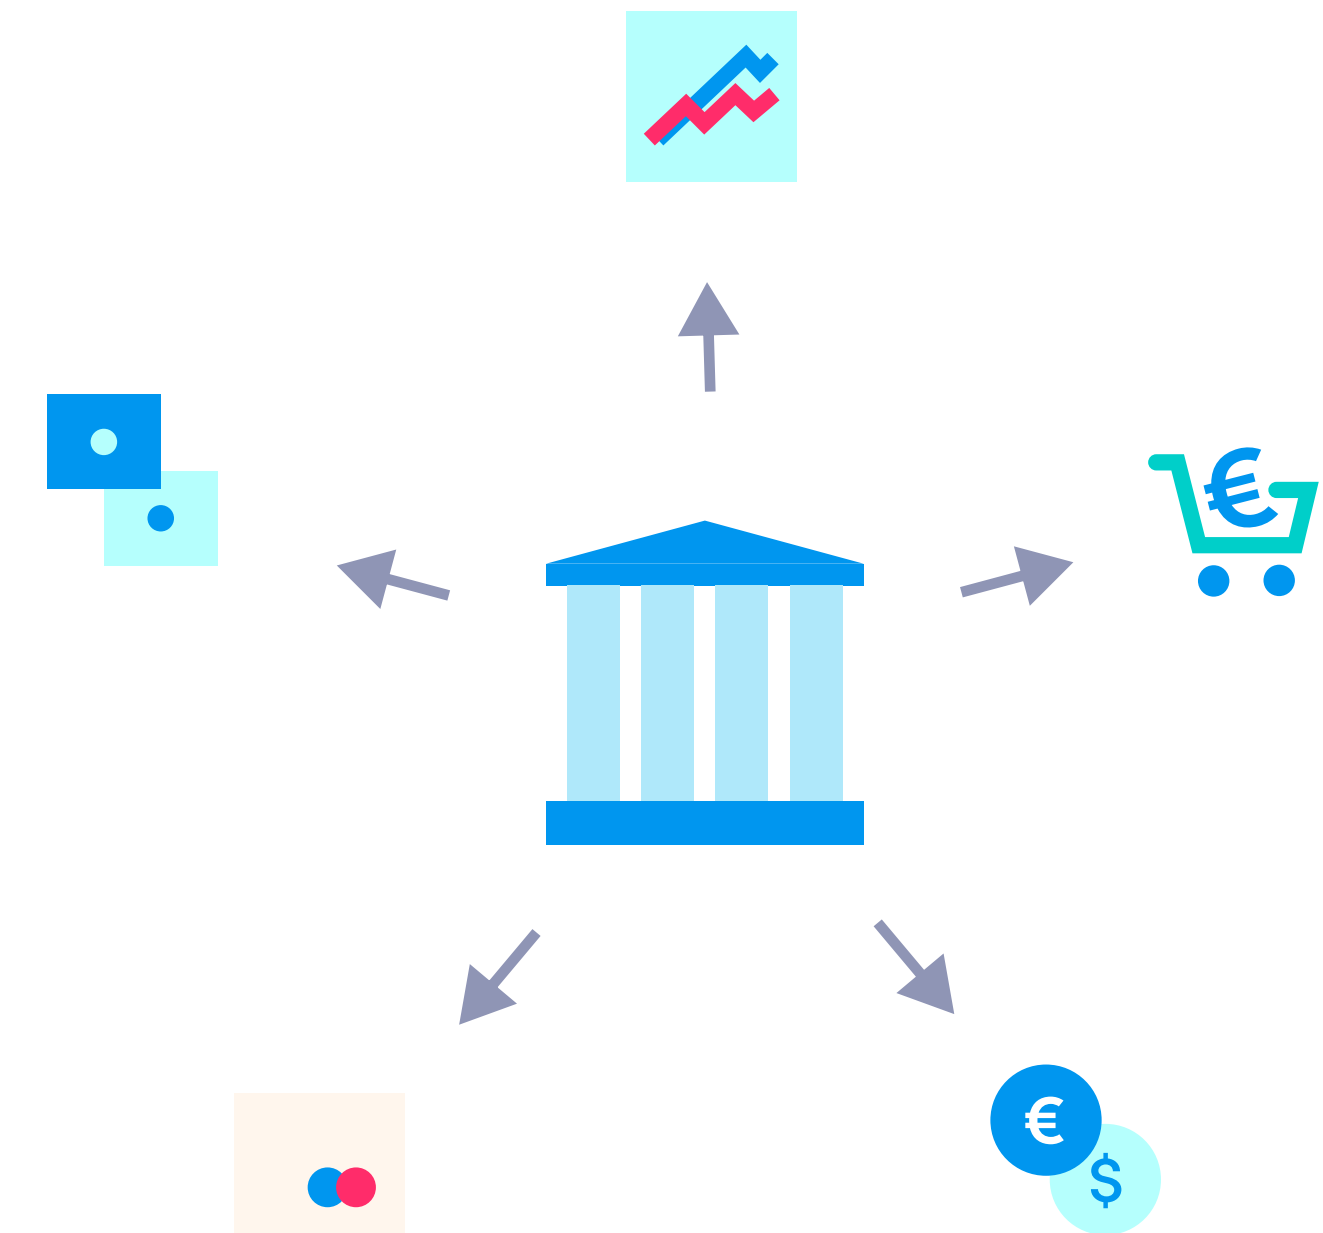

- Facilitating the opening of correspondent accounts in European and Canadian payment institutions.
- Providing compliance-as-a-service.
- With our team based in Canada, we maintain ongoing communication with regulatory bodies.
- Tailoring individual policies for each client

Payment infrastructure development

Facilitating Connections with Payment Service Providers

- Assistance in business and the payment infrastructure planning
- Advisory Support for Final Product Development
- 10+ BaaS-Partners Serving EEA/UK Region
- Expert Handling of Technical Integrations
- Solutions Available for Non-Licensed Companies
- Seamless Ready Integrations for Quick Connection

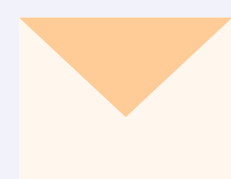

Advapay's advantages

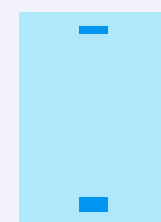

- **Fintech Project Kickstart:** Experts in launching successful payment businesses, covering licensing, software, and payment infrastructure.
- **Tailored Growth Support:** Partnering closely to understand your unique digital bank or e-wallet, ensuring demand and supporting business growth.
- **Holistic Infrastructure Assistance:** Beyond software, we facilitate connections with diverse payment and banking services, aiding in developing your payment infrastructure.
- **Flexible Solutions:** Customized pricing and solution packages, allowing seamless transitions to meet evolving business needs.
