02 : Showcase of Projects

AR-VR : Virtual Meeting Room

(Android/iOS/ Web Oculus Quest 2)

The Virtual Meeting Room Multiplayer project aims to create an immersive virtual meeting environment where users can collaborate, communicate, and interact with each other in real-time. By integrating MetaMask, a digital wallet and identity management tool for blockchain applications, the project adds an extra layer of security, authentication, and seamless cryptocurrency transactions within the virtual meeting space.

sales@expertappdevs.com

AR-VR : Wind Mill Web

The Wind Farm simulation created in Unity using C# is an interactive virtual environment that provides an immersive experience of a wind farm. The simulation offers an introduction to wind farms, including their purpose, benefits, and the process of harnessing wind energy.

Within the simulation, users can explore and interact with various parts of a wind farm, such as wind turbines, control systems, and power grid connections. They can learn about the different components and their functions, including the blades, tower, nacelle, and generator.

Expert App DEVS

AR-VR : Heart Simulation Web

The Human Heart Simulation created in Unity using C# is an interactive virtual model that visually and functionally represents the workings of the human heart. This simulation provides an immersive and educational experience by showcasing the essential functions and mechanisms of the heart.

Through the Unity platform, the simulation incorporates realistic 3D models, animations, and interactive controls to demonstrate how the human heart works. Users can navigate through different sections of the heart, observing its structures and understanding their roles in the cardiovascular system.

The simulation showcases the pumping action of the heart, depicting the coordinated contraction and relaxation of the cardiac muscles. It demonstrates how blood flows through the heart chambers, guided by the opening and closing of valves.

AR-VR : Furniture AR

The Furniture AR Visualization App is an augmented reality (AR) project that aims to revolutionize the way users experience and interact with furniture. By leveraging AR technology, this app provides users with a virtual showroom where they can visualize furniture pieces in their own physical space before making a purchase. It offers an immersive and interactive experience that helps users make informed decisions about furniture placement, style, and compatibility.

sales@expertappdevs.com

![Expert app DEVS logo]

AR-VR : iLearnie AR

The iLearnie AR project is an interactive augmented reality (AR) learning experience designed to make the process of learning the alphabet, numbers, mathematical equations, animal names fun for children. By leveraging AR technology, this project aims to provide an immersive and interactive way for children to explore and learn about letters, numbers, mathematical equations and animal names in a visually appealing and interactive manner.

Mobile Apps : StampWallet

GET IT ON **Google Play**
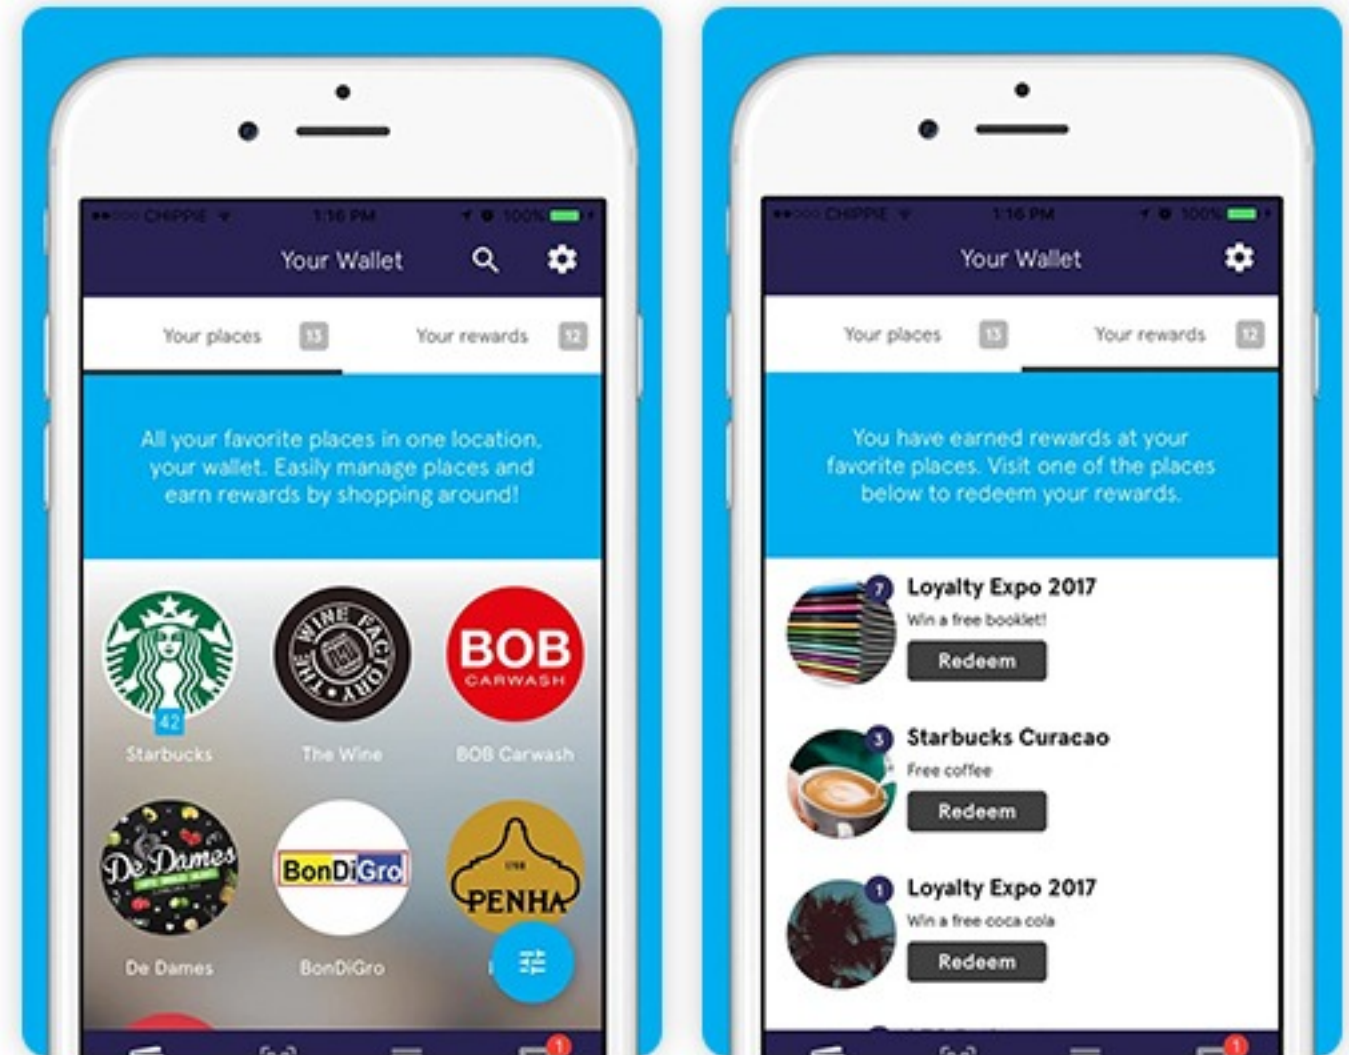

Available on the **App Store**

The Stampwallet app is a smart wallet voor 'places'. A place can be a brand, a store, a restaurant, bar, etc. When a place has a Stampwallet account they can add a Loyalty card to the Stampwallet app. Customers can now receive a point or stamp on that loyalty card after a purchase. They receive a point by scanning a unique QR code of that store that the cashier holds. Every QR code is unique and can have a certain value.

Tech Stack

React Native   **Laravel + MySQL**

Mobile Apps : SurgiConnect

GET IT ON **Google Play**

Available on the **App Store**

Surgeons receive notifications of new surgical patients and review their medical records on a HIPAA-compliant platform.

✅ SurgiConnect contracts directly with employers and major health plans

✅ For board-certified surgeons only

✅ Fill vacancies in your surgical schedule

Tech Stack

iOS (Swift)   **Android (Kotlin)**   **Laravel + MySQL**

03 : Our Process for Project Management

Project Initiation

- ✓ Determine the technical requirements and constraints.

- ✓ Define project objectives and goals by creating relevant documents such as FRD, BRD, SOW, or Technical proposals.

- ✓ Prepare a project charter outlining the project scope, deliverables, and constraints

Project Planning and Design

- ✓ Define the project goals, scope, and target platforms.

- ✓ Determine project timeline and milestones

- ✓ Identify required resources and estimate resource allocation

sales@expertappdevs.com

User Interface (UI) Development

- Design and implement the user interface, including elements, and interactive UI components.

- Prepare the wireframes and prototypes that outline the mechanics, visual style, levels, and other key aspects.

- Ensure usability and responsiveness across different devices and resolutions.

Resource Management

- Key activities in resource management.

- Resource identification and allocation.

- Resource leveling and optimization.

sales@expertappdevs.com

Communication and Collaboration

- Establish effective communication channels among project team members.

- Conduct regular team meetings to share updates and address concerns

- Utilize project management tools and software for collaboration

- Foster an open and transparent communication culture within the team

Project Execution

- Assign tasks to team members based on their expertise and availability

- Monitor task progress and ensure adherence to timelines.

- Address any issues or roadblocks promptly.

- Regularly communicate project status updates to stakeholders.

sales@expertappdevs.com

Quality Assurance

- ✅ Establish quality standards and metrics for the project.

- ✅ Conduct regular quality checks and testing.

  Ensure adherence to best practices and industry standards.

- ✅ Continuously monitor and improve the quality of project deliverables

Project Monitoring and Control

- ✅ Regularly track project progress against the planned timeline and milestones.

- ✅ Monitor resource utilization and make necessary adjustments

- ✅ Continuously assess project risks and implement mitigation measures.

- ✅ Address scope creep and change requests through a formal change control process.

sales@expertappdevs.com

Conclusion

- ✓ Emphasize the importance of following a structured project
- ✓ Encourage continuous improvement through feedback and lessons learned.
- ✓ Provide contact information for further inquiries or support.
- ✓ Remember to tailor this document to match your organization's specific processes, tools, and terminology

Optimization

- ✓ Optimize the web/app/game's performance, such as reducing draw calls, optimizing shaders, and managing memory usage.
- ✓ Implement asset bundling and streaming techniques to improve loading times.
- ✓ Profile and optimize code and graphics to ensure smooth gameplay.

✉ sales@expertappdevs.com

Publishing and Deployment

- ✓ Build and export the project for the target platforms.

- ✓ Follow the platform-specific guidelines and requirements for packaging and submission.

Post-Launch Support and Updates

- ✓ Provide ongoing support for the web/app/game, addressing bug fixes and responding to user feedback.

- ✓ Plan and implement updates, patches, and new content releases to improve and expand the web/app/game.

sales@expertappdevs.com

04 : Business Hiring Models

Expert app DEVS

We can help you with our 2 business models mentioned below

MONTHLY HIRING MODEL

160 Hours/20days

HOURLY HIRING MODEL

starts with 40 hours block

Simple Hiring Process

- ✓ Share your requirements with us.
- ✓ Choose the best candidates from the resumes we provide
- ✓ Interview them over Zoom
- ✓ Pick the one you like best and add them to your team
- ✓ Sign the SLA, NDA and start your project

sales@expertappdevs.com

What are the advantages of dedicated hiring model ?

- ✅ The best quality and assurance from professional organization as compared to a freelancer.

- ✅ The infrastructure,hiring & BGV cost would be minus as you will get the resource ready from organization who has already completed the process at the time of hiring.

- ✅ Project Manager & Sales Person will be there as a complimentory to take care of technical & commercial things respectively from our end.

- ✅ The resource would be your SPOC so can have previllage to communnicate and assign the task on daily basis.

- ✅ The resource will compensate(Paid) weekends if there is a strict deadline for the certain projects (Depends on availability of resource).

- ✅ Daily task report (DSR) updates with the number of hours spent on each task.

THANK YOU
