WORK EXPERIENCE

Full Stack Developer | MERN Developer Troon Technologies

07/2022 - Present

Islamabad

Troon Pakistan is an agency that helps businesses build advanced web, mobile, and cloud technologies by providing custom software solutions and website services.

Achievements/Tasks

- As a MERN Developer, I excel in building robust web apps with Node.js, React.js, Express.js and MongoDB. I have used Web 3.0, FLOW and NEAR blockchain integrate in application to get data and send transaction to the blockchain. I used Redux Saga, Redux Thunk, and Context API. Enhancing user engagement is my forte, with Node Mailer and Twilio for communication. I rely on Pinata, Cloudinary, and Multer for storage, prioritize security with JWT and Passport, and use Cookies for session management. I'm a proficient API tester with Postman and Swagger, creating user-friendly apps that exceed expectations.

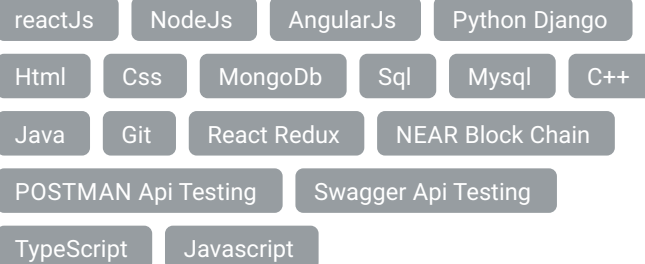

Full Stack Developer NCRI(National Credit Recovery Inc) Solutions

05/2021 - 06/2022

Achievements/Tasks

- As a Full Stack Developer. My expertise included AngularJS for the front-end and Python Django, along with Django Rest Framework, for the back-end and MYSQL for the database management. I have implemented secure user authentication using JWT and Passport (JWT). My proficiency extends to using cookies for session management, conducting API testing with Postman and Swagger for API documentation. I have also inquired into performance testing with Locust, utilizing FTP and SFTP for cloud file management, and imposing Amazon S3 bucket for efficient storage. Furthermore, I possess a strong track record in deploying MySQL databases, Angular front-ends, and Python Django back-ends, both on Heroku and Linux VM servers.

SKILLS

PERSONAL PROJECTS

HRMS

- HRMS project where I was involved in both the back-end and front-end development using Python Django and AngularJS. This project focused on streamlining the entire recruitment process, from candidate discovery and screening to the final onboarding of qualified applicants.

BoPayment(Mini bank)

- I specialize in Front-end React.js development, focusing on payment systems. My projects involve NIUM and MSWIPE, both integral parts of a leading global financial technology platform. This platform is transforming the way individuals and businesses handle global fund transfers, payments, and receipts.

Metaverse(MTVRS)

- I have worked on a Metaverse NFT reward platform where users play games to earn NFTs and accumulate points that can be exchanged for additional NFTs. This project also involved seamless integration with the NEAR blockchain.

Math App for Child

- I have developed a React.js and Node.js-based math app designed for children. This project aims to help children strengthen their foundational arithmetic skills while igniting a passion for learning.

ApplicationRating App

- I have created a versatile rating app using React.js and Node.js, capable of gathering user feedback for a wide range of applications.
