INTERNSHIPS

Sep 2020 — Dec 2022	Android Internec, StepUp IT Solutions	Faisalabad
	<ul style="list-style-type: none">Successfully completed a comprehensive Android development course in just four months, gaining expertise in front-end and back-end development.Acquired proficiency in using XML for front-end UI design, creating visually appealing and user-friendly Android applications.Developed strong Java programming skills for back-end development, enabling the implementation of robust and efficient application logic.Worked extensively with Firebase, leveraging its real-time database and cloud services to enhance app functionality and user engagement.Implemented form validations to ensure data integrity and a seamless user experience, contributing to a 20% reduction in form-related errors.Utilized APIs to integrate external services and data sources, resulting in the expansion of app features and improved data retrieval efficiency.Recognized as a top performer during the Android development course, consistently delivering high[1]quality projects and assignments.Successfully completed a challenging internship project, receiving positive feedback from mentors for meeting project goals ahead of schedule.Developed and published a personal Android app on the Google Play Store, showcasing individual initiative and project management skills.	

WORK EXPERIENCE

Dec 2022 — Present

Android Developer, WapExp IT Solutions

Faisalabad

- I started my own independent study of Flutter programming to broaden my knowledge of technologies for mobile app development.
- Mastered the frontend framework of Flutter, producing aesthetically stunning user interfaces with a variety of widgets.
- Created and released independent Flutter projects to get practical knowledge of creating cross-platform mobile apps.
- Flutter and Android programming expertise have continued to grow as a result of active participation in online groups and workshops.
- For the purpose of demonstrating adaptability and expertise in mobile app development, I created personal projects utilizing both Android and Flutter.
- Flutter and Android programming expertise have continued to grow as a result of active participation in online groups and workshops.
- For the purpose of demonstrating adaptability and expertise in mobile app development, I created personal projects utilizing both Android and Flutter.

PROJECT WORKED

Jun 2021 — Aug 2021

School Management System

Faisalabad

- **School Management System** | XML, JAVA, API's Integration, Firebase, Third Party Integration, Project Management, User Authentication.
- Central control hub for administrators and staff.
- Manages student records, attendance, schedules, and results.
- Teachers can input grades and assignments.
- Administrators can generate various reports.

Student Management:

- Securely stores student information, including personal and academic details.
- Tracks attendance, disciplinary records, and medical information.
- Centralized database for easy monitoring of student progress.

API Integration:

- Enables seamless data exchange between the web portal and mobile application.
- Facilitates real-time updates and synchronization of student records.
- Android Parent Application:
 - User-friendly interface for parents.
 - Access to child's academic information, attendance, and exam results.
 - Real-time notifications on activities and achievements.

Attendance Tracking:

- Digital attendance marking by teachers.
- Parents can view daily attendance on the mobile application.

Communication Tools:

- Messaging and in-app chat for parents and teachers to interact.
- Discuss student progress, behavior, and concerns. Performance Analytics:
 - Generates comprehensive reports and analytics on student performance.
 - Helps identify areas of improvement and devise personalized learning strategies.
